

MyBuddyCheck.com announces the launch of a New Personal Weather Emergency Program (WEP) for seniors that live alone

Bryn Mawr, PA –Caryl Technologies, LLC announced the launch of New Weather Emergency Program (WEP) for seniors that live alone when severe weather strikes.

A WEP is a 30 day Weather Emergency Program (WEP) subscription that can be activated whenever there is a severe weather condition that could present a danger to seniors who live alone. It creates an in-home monitoring system that automatically calls at scheduled times and checks on loved ones using their own home phone. WEP enables notification of family and friends by SMS and email even if the senior's power or phone lines are disrupted.

By calling 800-903-7104 or visiting www.mybuddycheck.com, family members, caregivers, or seniors can register for a 30 day My Buddy Check WEP membership and not activate it until there is a weather emergency. At that time, they simply call, email, or SMS us at support@mybuddycheck.com to activate their registered WEP and for the next 30 days loved ones will receive the full services of My Buddy Check's daily monitoring service with status updates to family and friends.

- No longer will seniors be trapped in their own homes during bad weather and find themselves cut-off from family and friends for an extended period.
- No longer will they run out of needed medications, household supplies, suffer from hypothermia due to cold weather conditions, or hyperthermia in heat waves.

My Buddy Check WEP membership cost start at less than \$10 so anyone can have peace of mind from knowing that this safety net is in place and ready for immediate use when needed. WEP will also work with the My Buddy Check Caregiver iPhone app.

Based in Bryn Mawr, Caryl Technologies is an innovative web 2.0 company that integrates speech and internet technology with any mobile or standard telephone.
